About Me

MERN stack developer with hands-on experience building full-stack web apps using React, Next.js, Node.js, and MongoDB. Junior Developer Intern at career institute, delivering production sites for multiple clients.

Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Next.js, Tailwind CSS, Ant Design, React Native

Backend: Node.js, Express.js, MongoDB, Mongoose, MySQL, Cloudinary

Auth & Integrations: JWT, OTP flows, Stripe

Tools: Git, GitHub, Claude Code, Codex

Experience

Junior Developer Intern, Career institute, Faisalabad (4 weeks)

- Developed a full-stack university department management system, implementing student management, class formation, announcements, and document downloads using the MERN stack.
- Built a full stack restaurant applications to manage reservations, products and team members with admin panel

Education

University of Agriculture Faisalabad (PARS), BSSE 5th Semester 2024 – 2028

Saylani Mass IT Training, Faisalabad, Web and Mobile Application Development Sep 2024 – Sep 2025

Projects

University Computer Science Department, Full Stack

Demo: <https://dcspars.vercel.app>

- Built a full-stack MERN management portal (React, Express, MongoDB) with 18+ REST endpoints, JWT multi-role auth, and OTP password reset.
- Built a PDF generation pipeline, in-memory caching layer, and Excel/CSV import system with an admin analytics dashboard.

BMI Calculator & Diet Planners, Full Stack

Demo: <https://bmigo.vercel.app>

- Built secure API endpoints with spam protection, SEO structured data, and an accessible, themed UI component system.
- Developed a full-stack web application to calculate BMI and help users understand their weight category.
- Built diet planning features with a responsive interface for creating and managing personalized diet plans.

Restaurant Website, Full Stack

Demo: <https://hearthandstove.vercel.app>

- Built a full-stack restaurant site (Next.js, TypeScript, Tailwind) with 18 public sections and a complete admin panel.
- Built an image upload pipeline with file-type validation, JWT-based admin auth, and a custom design system with scroll animations.
