SKILLS

Frontend: React.js, Tailwind CSS, Ant Design, Bootstrap

Backend: Node.js, Express.js

Database & Storage: MongoDB, Cloudinary

Tools: Git

EDUCATION

BS (Software Engineering)
University of Agriculture, Faisalabad

- Ongoing — 4th Semester

PROJECTS

BMI Tracker (Full Stack Web Application)

Live: <https://bmigo.vercel.app>

- Implemented user authentication system with secure login, registration, and role-based access (User & Admin).
- Built BMI calculator with real-time tracking and historical data storage.
- Designed interactive dashboard with BMI progress charts and analytics using Recharts.
- Integrated RESTful APIs for seamless frontend-backend communication.
- Enabled profile management with image upload and user information update functionality.
- Developed admin panel to monitor users and their BMI records.

Tech Stack: React.js, Node.js, Express.js, MongoDB

Collaborative Notes App (Full-Stack Web Application)

Live: <https://uaf-notes-sharing-app.vercel.app/>

- Built a full-stack notes management system with secure user authentication
- Implemented CRUD operations for creating, editing, and deleting notes
- Added note-sharing functionality allowing users to collaborate with other registered users
- Designed backend APIs for managing user-specific and shared content

Tech Stack: React.js, Node.js, Express.js, MongoDB
